

Advanced CrashPlan PRO/PROe reporting platform, for service providers, education and enterprise.

Monitor & report on multiple, unrelated PRO/PROe environments from our one, easy to use SSL-protected web-admin portal. Search, filter and export results as HTML, .csv or XML.

- Add new sites or servers with just a few clicks of the mouse; by leveraging CrashPlan-based manager (read-only) accounts from each server, access & control is always in the client's hands.
- Detailed alerting, usage and billing reports, with per-org pricing and cost-recovery rates.
- Dynamic pricing plans permit different rates for "Destination A" (\$) vs. "Destination B" (\$\$\$).
- Automatic uplift from 'N/C trial' to 'billable'; threshold/tiered pricing; per-GUID exemptions.

You've invested in the best backup platform to protect your many clients; now, get paid for it. E-mail us today to book your very own private tour of this scalable, powerful management tool.
