

Out of Sight. Peace of Mind.

The data protection solution for your small or medium-sized business.

Enterprise class, small-business price

You know how important your data is to your business, and that you need to safeguard it from loss or corruption. The challenge is finding a solution that performs to your expectations—providing enterprise-quality protection without the enterprise-scale price tag.

Background Backup answers both needs. Using proven CrashPlan PRO technology, it enables seamless, dependable backups, effortless web-based file retrieval, and efficient, timely restores—all for a single monthly fee.

Reliable, consistent and secure, **Background Backup** backs up your company files invisibly and automatically—whether you're in the office or on the road.

Easy to use—enterprise strength

- Backs up securely to our offsite data centre, your corporate server, or a combination of both
- Server-side client management options for corporate accounts (security settings, retention policies)
- Server-initiated client upgrades, typically with no user interaction or system restart required
- Provides user and manager level statistics and reporting

Flexible, comprehensive backup options

- Continuous, incremental, differential backup
- Automatic archive validation and recovery
- Data de-duplication, compression and encryption
- Ability to restore files with an 'as of this date' calendar filter

Tailored to your environment

- Supports wherever, whenever connectivity
- Uses your existing infrastructure
- Scales simply to accommodate thousands of clients
- Provides centralized remote management communication and archive status

\$29.90 per seat per month

Background Backup is highly affordable and completely flexible—with no seat minimum and no term obligation. Our one convenient fee includes:

- full backup service, on or off your corporate network
- 50 GB of compressed data backup per month per seat, with the option to increase as needed
- free, regular software updates
- access to live telephone support

Discounts available

If your organization requires 10 or more seats you can enjoy special savings on your subscription to Background Backup.

Background Backup works with your existing network infrastructure across multiple platforms: PC, Mac, Linux and Solaris.

Worry-free protection

Background Backup does its work behind the scenes, letting you carry on with business as usual while it performs scheduled or continuous backups. Whether you're in the office or on the move, Background Backup uses your current network connection to back up your files efficiently and securely.

Installation is quick and uncomplicated; day-to-day operation is seamless. Authorized users can access and retrieve protected files via Background Backup's simple web interface whenever, wherever required.

Quality service. Committed support.

With Background Backup, it's easy to restore your own data whenever you need to. And every subscription includes access to top-notch technical support. If you need assistance, our expert staff is available and will respond within our support hours of 8 A.M. and 8 P.M. Eastern, Monday to Friday. 24/7 support options are also available on a per-account basis—we'd be happy to discuss pricing and service level options with you.

The security you require

Background Backup's standard offering provides robust, enterprise-grade security: 448-bit data encryption and 128-bit for optional web-interface communications encryption. If you have heightened security concerns, we offer a private-key solution that turns your backup repository into a "digital safety deposit box" accessible by only the most select authorized personnel.

Accelerate your deployment

We can capture the bulk of your data in a single visit to your location and transport that snapshot directly to our servers—getting you up and running with a complete data save in a compressed timeframe.
